SUMMARY

Results-driven Software Engineer with 3+ years of professional experience in full-stack development using React, Node.js, REST and GraphQL APIs, and SQL/NoSQL databases. Proven ability to translate designs and prototypes into fully functional, end-to-end applications. Experienced in developing backend services, data-ingestion pipelines, and delivering end-to-end high-performance features. Collaborated with cross-teams to develop user-focused systems.

EXPERIENCE

- Zeliot Connected Services Pvt. Ltd.

Software Engineer - 2
05/2026 – Present | Bengaluru, India

- Contributing to the development and enhancement of scalable backend services and high-performance applications while supporting system reliability and performance improvements.
- Led the implementation of localization at the backend API and data and alert pipeline level, supporting 5 languages and regions.

Software Engineer - 1
09/2023 – 04/2026 | Bengaluru, India

- Automated database migrations and schema management across multiple environments, reducing manual effort and improving data consistency, operational efficiency, and reliability.
- Led the POC and system migration from Redis to DragonflyDB, improving caching performance, increasing Queries Per Second (QPS), and reducing latency.
- Led migration from MySQL to PostgreSQL, updating the codebase and database schema, ensuring data integrity, managing data migration processes, and improving database performance and response times.
- Built responsive, high-performance web apps using React and Node.js. Skilled in component-based architecture, REST/GraphQL APIs integration, and MUI.
- Identified and resolved SCA and SAST vulnerabilities through security assessments and VAPT, implementing security best practices to strengthen backend services and APIs.
- Developed and optimized backend services and data-ingestion pipelines, implemented REST and GraphQL APIs, scheduled report delivery using cron jobs, and Redis-based caching to improve response times.

Full Stack Developer Intern
06/2023 – 08/2023 | Bengaluru, India

- Developed **Telematic Analytics—Zeliot** as a mini-project, a platform for processing, analyzing, and visualizing telematics device data and KPIs.
- Implemented responsive React components and participated in code reviews, debugging, and testing.

PROJECTS

VCADDEMY - Institutional Web Platform
Developed and actively maintaining a responsive web application for an educational institute. Built with React and Material-UI.

SKILLS

ReactJS • Material UI • Frontend • NodeJS • GraphQL • REST APIs • ExpressJS • Backend • Authentication (JWT/JWE) • SQL • NoSQL • MongoDB • Redis • Apache Kafka • Kubernetes • Docker • Postman • Git • C / C++ • JavaScript • Python • Full-Stack Development • Java • Microservices • Bootstrap

EDUCATION

Master of Computer Application (MCA)
KLE Technological University
02/2022 – 09/2023 | Hubballi, India

Bachelor of Computer Application (BCA)
JSS SMI UG & PG Studies
06/2018 – 09/2021 | Dharwad, India

Pre University
KVSR Comp. PU College
06/2017 – 03/2018 | Gadag, India

STRENGTHS

Dedicated and Determined

Quick Learner

Adaptive Person
